Choose the Philosophy of Education that fits you well and give justification for your choice. [70-90 words]

Perennialism meaning is teaching ideas that are everlasting. I chose this because it helps to assist student to think rationally and develop minds that can think critically. By exposing students to the enduring truths and insights of the past, perennialism can help them to gain a sense of perspective and to understand the timeless questions and challenges that have faced humanity throughout history. This can help to enrich their education and deepen their sense of meaning and purpose.
